Software Engineer & Full-Stack Developer skilled in React, Node.js, Laravel, Python, and SQL. I build secure, scalable websites, apps, APIs, and AI agents with a focus on clean architecture and performance. Experienced in leading projects, collaborating across teams, and delivering real business value.

Experience

- 2024-06 -
2024-09

Software Engineering Analyst
OMNISHORE MED TECH, Casablanca
-During my time at Omnishore group medtech Company, I worked on a project focused on SQL Server Integration Services (SSIS).
-As part of the Microsoft team, I contributed to data integration, ETL processes, and database management.
-This experience allowed me to develop technical skills in SQL Server and gain hands-on experience working with enterprise-level data solutions.
- 2023-07 -
2023-09

Cybersecurity Intern
PC INFO, Casablanca
-Analysis of vulnerabilities and IT risk management.
-Implementation of protection measures for systems and networks.
-Monitoring security incidents and proposing solutions.
-Raising user awareness of best practices in cybersecurity.
- 2019-09 -
2020-01

FOOTBALL COACH
KINGAN FC, Suzhou
- worked as a coach, teaching children under 12 the basics of football.
-I also focused on improving their physical abilities and mental development to help them progress holistically.
